

Technical Support CAD/PLM

About us

PDSVision is a Northern European IT provider of solutions and services directed mainly towards research and development challenges. PDSVision employs more than 80 professionals in Sweden, Norway, Finland, Denmark, Germany and the UK. The company, consisting of eager and resourceful co-workers, is under continuous growth and that is the reason why we are looking for talented people who can help us support our customers in a long-term relationship. We have an open-minded corporate culture where we care for and help each other.

The vacancy

The role as technical support CAD/PLM consists of helping out our customers with their immediate technical challenges in 3D CAD and PLM. You will also support the technical and sales team throughout the organization with your expertise and with time perform server level tasks towards customer Windchill PLM installations.

You may be required to travel to Sweden and Finland as part of your training schedule. Unless projects or specific tasks require your presence elsewhere you will work from our technical department in Gran, Hadeland.

Opportunities

PDSVision works towards many different segments of Nordic industry where there is a demand for technical solutions that will help improve the market impact of our customers. Our software supplier PTC delivers in addition to CAD and PLM solutions for spare part management (Service Lifecycle Management), Industrial Internet of Things (IIOT), Augmented Reality (AR) and Additive Manufacturing (3D printing). Due to our constant growth and our increasing amount of customers mean that we require skilled and resourceful employees. Demands for solutions are on the rise and you will therefore be able to expand your expertise within several of these fields.

Requirements

Your values and work ethics make you a valued team player that supplements our existing team. Personal abilities like a positive attitude, humility, social skills and punctuality cannot be taught and are therefore highly cherished. Preferable you will have a degree within engineering, product development or IT, but for the right person your set of qualifications, personal skills and attributes may count for more than a formal education. You should enjoy troubleshooting and solving technical challenges. Fluency in Norwegian and English is mandatory since you will be communicating with our supplier, colleagues and customers on a daily basis.

We would like to see that you have several of the following

- 3D CAD software, preferable Creo Parametric
- Experience with Product Data Management (PDM) or Product Lifecycle Management (PLM)
- Windchill PLM
- Experience from technical product design
- 1-3 years of work experience within IT or engineering industry

You will have no problems with our training schedule if you are a quick learner and willing to drive your own learning curve.

Other info

Start date upon agreement. Interviews are conducted continuously so please submit your application as soon as possible.

Please submit your CV and application written in Norwegian through our corporate portal at www.pdsvision.com/careers. Recommendations, resumes and diplomas should be brought if you are selected for an interview.

We will not contact your current employer without your consent.

PDSVision does not offer sponsorship to non-European applicants.

For any unanswered questions or further details about the position, please contact Senior Technical Consultant Christian Bunes-Roa directly on mobile (+47) 4832 1100 for an informal conversation.
